Get Employed in the IT and Creative Industry

A few years ago, they were just like you studying in the Faculty of Computing,

... and now they are ready to share with you how they manage to strive in the IT and creative industry.

Abstract of the talk: In this second SEW event, we are delighted to invited our graduates back to the university and talk about their own experiences in getting employed in the IT and Creative industry. They will also showcase some commercial projects they have been involved with, for example iPhone game and iPhone app development, Web Content Management application and Graphics Design projects.
