

Setting Up Your Personal Web Pages

The University Web Server is configured to accept personal web pages for all users. Personal web pages are for personal pages or pages concerned with personal projects or student projects.

Users are reminded that pages should remain well within acceptable guide lines and not contain and material not owned by the user or considered obscene.

Follow These Steps for a Personal Web Page: *(For Windows NT or 2000)*

- Open Windows Explorer, and open drive X:/
- Create a directory called 'public_html' (all lowercase, and without the quotes)
- Exit Explorer and reboot Windows
- When windows reboots you should see a W:/ drive
- This is your personal web space, Do Not use the X:/ drive to put up work, it will not be visible from the web
- Ensure your first page in the main directory and any subsequent directory is index.htm or index.html
- Your area is now <http://www.londonmet.ac.uk/~username>
(Substitute username for your username)
