

Finding your way around

All buildings have coloured signage each with its own colour (in Tower Complex this has been divided into 4 coloured zones). You will be able to tell the building/zone you are in by the colour of the door number signs and other signage. To find your way to a room, take note of the Room ID and use one of the building maps.

Room IDs explained

The first part of the room ID relates to the building it is in, the next part of the room ID is the floor its located on and the final part of the room ID which appears after the dash, denotes the actual number of the room.
