

Tuition fees for Biomedical Sciences leading to MD

As the course is taught in two different institutions fees need to be paid to both London Metropolitan and the University of Health Sciences Antigua (UHSA).

Fees for London Metropolitan are per year (for students starting in September 2015):

UK and EU students full-time £9,000

International students full-time £10,500

Fee structure for The University of Health Sciences Antigua*

Year 1 \$10,000 US Dollars (plus around £3000 -£3,500 expenses for the intensive two month summer school which include accommodation, books, equipment, air fare, food and general living expenses).

Year 2 \$10,000 US Dollars (plus around £3000 -£3,500 expenses for the intensive two month summer school which include accommodation, books, equipment, air fare, food and general living expenses).

Year 3 \$10,000 US Dollars (plus around £3000 -£3,500 expenses for the intensive two month summer school which include accommodation, books, equipment, air fare, food and general living expenses)

Year 4 \$10,000 US Dollars (plus living expenses for a year on Antigua to complete the Basic Sciences part of the MD. The living expenses will be approximately 5 times the expenses for the 2 month summer school.)

Year 5 First Clinical Rotation Year: \$25,200 US Dollars plus approximately the same in living expenses and insurance.

Year 6 Second Clinical Rotation Year: \$25,200 US Dollars plus approximately the same in living expenses and insurance.

The clinical rotations will be taken whether in the USA or the UK.

The estimated fees to be paid to UHSA during the clinical years include the yearly UHSA tuition and the fees for the clinical rotations. The exact fees charged for clinical rotations will vary depending upon the clinical rotation site.

(*subject to confirmation from UHSA for 2015/16)
